✉ projects

Be The Mindset Website

This is was my first collaborative project. Me and my friend built this website because we both enjoy watching motivational videos, and also sharing motivation.

Be The Mindset App

This app was made to encompass a feeling, the feeling of being inspired. I wanted to provide a little tool for people to keep on their pockets so that they won't have to go online searching for motivation when they need it.

Love Calculator

This was my first iOS app I created after an intro course to iOS (4 week long summer program 2016). It's a really small app where you would put your name & the lovers name and it will give you a perentage on how much the lover loves you!

FoodPin

I learned more to program with swift when I read the AppCoda Book. The main point of the app was to learn by doing. In this app, you can save and share your favorite restaurants.

✉ Organizations

Hack Club

Winter 2017 (present)

Leader

- Started a coding club at my high school and am teaching 24 other students how to make a website from scratch using Html, CSS & JS.

Nano Hackers

Spring 2017

Student

Enrolled as a student in this non-profit organization and learned how with javaScript.

Programs

Summer 2016

Make School

Student

Completed intro track. Four weeks long summer program that taught me how to build iPhone Apps with Swift.

Make School

Student

Summer 2017

Enrolled in apps track. Eight weeks long advanced summer program that taught me how to build iPhone Apps with Swift.

Hackathons Attended

1) Defhacks(Nov. 2016)

2) PennApps(Jan. 2016)

3) HackNYU(Feb. 2017)
